EDUCATION

Lycée ZM – Tunisia
Baccalaureate in Computer Science
2010 – 2011

ISIMM
Bachelor's in Applied Computer Systems & Software
2012 – 2015

ISAMM
Master's in Computer Engineering
2015 – 2018

SKILLS

PHP / SYMFONY
VUE.JS 2/3
JS / TYPESCRIPT
REST / GRAPHQL
ANGULAR / IONIC

LANGUAGES

English
French
Arabic

HOBBIES

Chess
Swimming
Spearfishing

WAJIH BNELHADJ SGHAIER

Software Engineer

PROFESSIONAL EXPERIENCE

Sept 2020 – Present · Doinsport, Marseille 13002

Fullstack Developer

Technical lead responsible for the architecture, quality, and scalability of the web applications on the SaaS platform dedicated to sports complex management.

Responsibilities:

- Design and evolution of the Front-End architecture for Web and Mobile applications.
- Development of new features in Vue.js 2, Vue.js 3, Angular, TypeScript, and PHP/Symfony.
- Development and maintenance of REST APIs for various platform modules.
- Progressive migration of applications from Vue.js 2 to Vue.js 3.
- Development and maintenance of iOS and Android mobile apps (Capacitor).
- Management of mobile deployments on App Store and Google Play via Fastlane and release automation.
- Participation in production releases and continuous improvement of CI/CD pipelines.
- Implementation of best practices: Clean Code, code reviews, software quality and architecture.
- Close collaboration with Product Owners for functional scoping, sprint preparation, and roadmap.
- Mentoring and coaching of junior developers.

Key Achievements:

- Developed features for booking, CRM, certified POS, subscriptions, tournaments, dashboards, and club management.
- Designed reusable components and improved Front-End architecture for scalability.
- Developed and integrated REST APIs enabling interconnection between platform applications.
- Optimized performance and user experience of Web and Mobile applications.
- Implemented unit tests and contributed to improving application quality and reliability.

Stack: Vue.js 2 / Vue.js 3 · Angular · JavaScript · TypeScript · WebSockets · Storybook · Docker · CI/CD · PHP · Symfony

June 2019 – Aug 2020 · Odeven, Clermont-Ferrand 63000

Fullstack Developer

Development of data-intensive, real-time web applications in the fields of smart mobility and business project management.

Project: SmartWay – Smart Traffic Management

Design and development of a web application for an intelligent road traffic management system based on the analysis of floating mobile data, with the goal of optimizing traffic regulation while reducing physical infrastructure costs.

- Backend development with Symfony 4.4 (REST API).
- Frontend development with Vue.js 2.6.
- Implementation of real-time data streams via WebSockets and ReactPHP.
- Processing and exploitation of floating mobile data for dynamic traffic regulation.
- Participation in technical design and architecture decisions.
- Database management with MySQL.

Stack: PHP · Symfony 4.4 · Vue.js 2.6 · REST API · MySQL · ReactPHP · WebSocket

Dec 2018 – June 2019 · Ingeneria, Fréjus 83600

Fullstack Developer

Design and development of a web application for candidate management and real-time video stream processing.

Key Achievements:

- Study, design, development, and deployment of the web application.
- Development of a real-time video stream management system.
- Implementation of an online digital CV creation feature accessible via a direct link.
- Design of a space for managing candidates and advisors, facilitating interaction and progress tracking.
- Development of an administration back-office for user and system data management.
- Creation of an online learning space enabling candidate training via dedicated resources.

Stack: PHP · Symfony 3.2 · MySQL · AngularJS · JavaScript · HTML · CSS

Project: Ingeneria Employment & Training

- Maintenance and evolution of the company website (frontend and backend).
- Website redesign: modernization of design, architecture, and UX improvements.
- Backend development with PHP and CakePHP 3.8: new features and server request handling.
- MySQL query optimization and cross-browser / responsive testing.

Stack: PHP · CakePHP 3.8 · MySQL · JavaScript · jQuery · HTML · CSS

Jan 2017 – Aug 2018 · Ubikey, Compiègne 60200

Frontend Developer

Project: Ubiweb

- Development of interactive interfaces with Angular 2 for creating and editing sticky notes, including drawing and real-time collaborative features.
- Implementation of instant data synchronization via WebSockets between web and desktop applications.
- Design and integration of KPI tracking modules and interactive charts for performance analysis.
- Unit and functional testing with Jest and Karma.

Stack: HTML · CSS · JavaScript · TypeScript · Angular · WebSocket · Jest · Karma
